

**On November 21-22, 2015, near Munich, in Scheirn Cross Nunnery, by the joint efforts of “Professors Forum” (Germany) and “International Centre for Christian Studies at the orthodox Church of Georgia” will be held an International Conference “Christianity and European Civilization”.**

**The aim of the scientific conference is to show the European Civilization and the whole World that Christianity has a great role in the development of intellectual culture, that these two fields do not contradict but fill each other. We also wish to show society that distancing of faith and science from each other is very dangerous, the tendency of which starts from Age of Enlightenment; and deplorable results can follow this process. Eventually we must find the way and means that will return alienated members of society to synergy of divine and human which from its side will help to defense peace and prosperity on the planet.**

**“Professors Forum” (Federal Republic of Germany)**

**“International Centre for Christian Studies at the Orthodox Church of Georgia”**
